

1. Program to print the elements of array using pointers.
2. Program to illustrate the concept of pointers
3. Program to illustrate the use of indirection operator.
4. Program to illustrate the use of pointers in arithmetic operations
5. Program to access an array using pointer.
6. Program to illustrate pointer to two dimensional array
7. Program to read string from keyboard and display it using character pointer.
8. Program to find length of a given string including and excluding spaces using pointers.
9. Program to copy one string to another using pointers.
10. Write a C program to copy one array elements to another array using pointers.
